Community Forum: Health, Environment, and Action

Are you worried about issues like asthma and obesity in your community?

Are you concerned about environmental impacts from illegal tire dumping, industrial waste, flooding, air pollution or household chemical exposures?

Are you ready to learn more about these issues and discover tools to help you take action?

SHARE your concerns with local scientists.

LEARN how the environment affects health.

PARTICIPATE in problem solving.

NETWORK with Atlanta's Environmental Health Community.

ACT on what you've learned and take it back to your community.

Saturday, October 11, 2014 8:30 am – 3:00 pm

WHERE

Emory University, Claudia Nance Rollins Bldg.
1518 Clifton Rd, NE Atlanta, GA 30322

THE CONSERVATION FUND

Understanding the Science

Participate in 3 topic based discussions where you can share your concerns with scientists and learn how the environment affects health.

Discussion Topics:

- **Indoor air pollution**
Mold, Pest control, Allergens, Asthma
- **Outdoor air pollution**
Transportation, Asthma
- **Illegal dumping**
Tires, Mosquitoes
- **Flooding / Climate change**
Mold, Mosquitoes, e.coli
- **Water & soil contamination**
Industrial waste
- **Household chemical exposures**
Chemicals that increase obesity
- **Obesity**
Healthy foods, Healthy neighborhoods, Built environment
- **Healthy schools and daycares**

Initiating Action

Participate in a guided problem solving session to identify action steps you can take back to your community.

Keynote Address

Harold Mitchell JR., SC State Representative
Mr. Mitchell heads a community-based non-profit organization that led to the clean-up of two waste sites and several brownfield sites. Mr. Mitchell will share his story of bringing federal, state, and local stakeholders together to create lasting change.
